The IGR Innovation Award for Ergonomics – a permanent fixture in the field of ergonomics

Nuremberg, April 2025 – The IGR Innovation Award for Ergonomics has established itself as a recognized award over the past six years and is now considered a reliable benchmark for the quality and innovative strength of companies and organizations that have dedicated themselves to the topic of ergonomics.

This year, numerous companies from a wide variety of industries once again faced the critical judgment of the expert jury. The result: an impressive range of innovative approaches and solutions that show how strongly the topic of ergonomics has now arrived in all areas of life – whether in the professional environment, in the home office or in leisure time, for example in sports. After all, health affects us all – regardless of industry, company size or lifestyle.

The IGR Innovation Award for Ergonomics honors not only technological innovations, but also holistic concepts that understand ergonomics as a forward-looking component of modern living and working environments. The award winners of previous years impressively demonstrate how sustainable ergonomic impulses can be.

This year, the Ergonomics Innovation Award for Ergonomics will be awarded for the last time – marking the end of a successful phase of awarding groundbreaking ergonomic developments. Our special thanks go to all applicants, supporters and the many committed experts who contributed to the success with their competence, their commitment and, last but not least, with a lot of heart and soul.

We are pleased to have made a contribution to the success of our award winners with the IGR Innovation Award for Ergonomics – and thus to the further development of ergonomics as the key to better health and quality of life.

Innovation Award for Ergonomics 2025 – Facts, Figures, Data

With the Innovation Award for Ergonomics, the IGR Institute for Health and Ergonomics GmbH wants to sensitize companies and organizations to the topic of ergonomics, promote ergonomic workplace design, and provide guidance for the procurement of high-quality ergonomic products and services.

- The Innovation Award was first publicly announced in October 2018.
- The application must be submitted and justified by the company itself.
- Of the 63 applicants for the year 2025, 21 were awarded.
- Applications came from the following areas:
 - Sports & Leisure
 - Büro & Homeoffice
 - Sleeping & lying down
 - Kitchen & Living
 - Light, Acoustics & Air Conditioning
 - Industry & Crafts
 - Wellness & Health
 - Children & Parents
 - Shoes & Insoles
 - Garden & Household

- 8 jury members evaluate independently of each other using a point system.
- The prize does not honour a single product, but a company.
- The award ceremony is designed and hosted by each individual company.
